

**Product description**

With a power consumption of minimal 0.5 Watt and maximum 2 Watt Lumi is the smallest lighting fixture in the Sundaya range. It has been designed to simply make the difference between darkness and light at the smallest possible power consumption and the lowest possible price. Lumi can be used as a night light in the bedroom, as an orientation point elsewhere in the house or used to light up the toilet during the night. Especially when operated in the 0.5 Watt mode the lamp can be left on all night without significantly affecting the amount of power stored in the battery of your solar generator. Operating is easy, pulling the left side of the pull cord switches the light on or off, pulling the right side switches between the 0.5 Watt mode and the 2 Watt mode.

**Functions / Features**

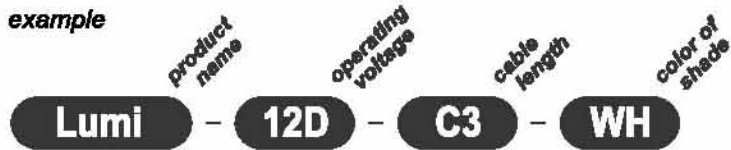

1. Lumi is a small lighting fixture for 12VDC
2. Two operation modes ( 0.5W and 2.0W )
3. Available in white, red and purple
4. Low power consumption
5. Low price
6. Simple but rigid installation
7. Easy replacement of the bulbs.

**Ordering Information**

Lumi is supplied with a 3 meter long cable, two light bulbs and an installation manual. The standard color of the lamp base and the cable is grey, the cap comes in white red or purple.
