- Halo reflectors & Skirt Lampshades

KIT ASSEMBLY CONFIGURATIONS

Starter Kit: SLK-060C

1. Remove C socket from 10m lead, connect A light + plug into Battery Pack outlet.
2. Remove C socket from end of HUB cable and connect A-light.

Standard Kit: SLK-200P

1. Cut off the F2 plug from the 7 metre cable. Strip back about 5mm of insulation of both conductors, insert into the two lugs supplied and squeeze the metal of the lug with a pair of pliers until the cable is held tight. Insert the lugs into the cable gland on the side of the junction box underneath the solar panel. Connect the two lugs to the +ve and -ve screw terminals in the junction box. The cable is marked +ve and -ve at regular intervals along the entire length of the cable.
2. Multi light can be plugged into a Battery Pack outlet.
3. Remove C socket from the 10m lead + from the end of HUB cable and connect both A-lights.

Deluxe Kit: SLK-200D

1. Follow same procedure as for 1. for SLK200P.
2. Remove C sockets from both 10m leads and connect Apollo lampholder and 2 Ulux fluoros and plug into both Battery Pack outlets.
3. Cut up 30m extension lead into suitable lengths for the remaining Ulux fluoro, A lights and Lumi lights.
4. Join cables using T-cons and two D plugs into the 4 way socket.
5. Use Broco Switch for the last Ulux.
