

PV-ezRack PostMount 6 and 8

The Universal Adjustable Pole Mount Solution

Clenergy's PV-ezRack PostMount delivers flexible, effective and durable designs to mount 6 or 8 panels per pole. Our PostMount systems are very high quality products designed to save you time and money on site. All Clenergy PV-ezRack PostMount systems use our patented PV-ezRack rails ensuring strength, flexibility and ease of installation. The innovative adjustable angle cap enables the angle to be easily and quickly adjusted from 0 to 60 degree.

Specification

Installation Site:	Ground
System Tilt Angle:	Adjustable (from 0° to 60°)
Wind Load:	42m/s
Applicable Module:	Framed or frameless
Module Orientation:	Landscape
Post Height:	1.6m above ground
Ground fixation:	Concrete burying (1.2 to 1.8m)
Material:	Anodised aluminium, stainless steel
Warranty:	10 years

Key Benefits

Easy Installation

Patented rail, Z module and unique adjustable cap eliminate the need for onsite cutting, making the PV installation time short and cost efficient.

Great Compatibility

Designed as a universal mounting system, PV-ezRack PostMount is compatible with most of the major framed PV modules on the market.

Great Adaptability

The innovating steel cap and support pole allow the angle to be adjusted according to local geographical position and maximize the generating efficiency.

High Quality

Strict quality control over materials and finished products ensure optimum strength and long life for your installation.

10-Year Guarantee

A 10-year limited guarantee sets you free from worries about maintenance.

Key Components

Adjustable steel cap

The innovating adjustable steel cap allows you to tilt the panels to the optimum angle, maximising the energy output of your system based on your location.

PV-ezRack Rail

The patented PV-ezRack rail has two input spaces perpendicular to each other, one is used to place clamps and the other to connect roof hooks, all using our unique Z modules as junction components. This ensures you will save time on site.

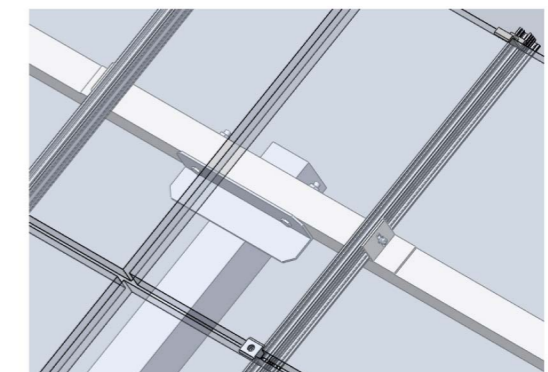

Clamps

With our Z module technology, our clamps can securely fix the PV modules directly to the rail. Clamp sizes from 35 to 57 mm ensure ezRack is compatible with all the major framed panels on the market.

Assembly Illustration

The adjustable steel cap makes Clenergy PostMount quick and easy to install.

The pre-assembled Clenergy PostMount makes the installation simpler.
