Electrician Solar Installer

About Us:

Nestled in the friendly and unique village of Nimbin, Rainbow Power Company has been a leader in the renewable energy sector for over 30 years.

Our team specialises in designing and installing customised renewable energy systems for homes and businesses and providing training and after-sales support. We stock and advise on a range of over 1,000 products in our Nimbin showroom and website.

Our team of 30 renewable energy enthusiasts have an innovative approach to business and community, and value the ability to think creatively.

About the Role:

We are seeking Electrician Solar Installers to join our team, full time, part time and casual opportunities exist for the right applicants.

Reporting to the Managing Electrician, this role will be responsible for safely carrying out all aspects of stand-alone and grid-connect solar power system installation and commissioning.

The role includes installation of 240Vac equipment on stand-alone and grid-connect systems, in accordance with the established methods & procedures of Rainbow Power Company and the regulatory compliance framework of Australian Electrical Standards.

Working in a team, the role involves mechanically fitting, installing and connecting solar panels and related infrastructure, so working at heights is required.

About You:

Qualifications & Tickets:

To succeed in this role, you will hold (and maintain) the following qualifications and tickets:

- Electrical Licence
- Drivers Licence
- Working Safely at Heights Ticket, or willingness to obtain within one week
- Construction White Card, or willingness to obtain within one month
- First Aid & CPR certification

The following qualifications will be beneficial in this role:

- WH&S Qualifications
- CEC Solar Accreditation (grid connect and/or stand alone)

Experience, Knowledge & Skills

To succeed in this role, you will be able to demonstrate:

- Broad range experience as an electrical tradesperson
- Experience in installation of residential and commercial off-grid solar systems
- Commitment to workplace health and safety
- High level technical skills, including troubleshooting
- High level of attention to detail and level of pride in work
- Ability to work successfully in a team environment
- A good level of physical strength and fitness
- Good customer relationship and communication skills

Reporting to: Managing Electrician

To Apply:

Please forward a cover letter addressing your capability to meet the requirements of the role and your resume to hr@rpc.com.au. Applications and expressions of interest are welcomed and will be accepted at any time.

Enquiries regarding this role should be directed to Hannah Phelan on Wednesday or Thursdays, or Nathan Hicks after 3:00pm on weekdays by telephoning 02 6689 1430.
