

JouleStick Lightkit

JOULESTICK LIGHTKIT

PS-JLK-01/03-230513

The JouleStick Lightkit is a handy package that contains all the ingredients to charge a mobile phone, make a TorchLight or a TableLamp added with the LEC30 PV Solar Panel to harvest the new energy from the sun to refill your JouleStick after its usage.

The JouleStick is an energy storage device containing 30kJ or energy that can be used to charge a mobile phone in combination with the Phone Charge Cables that are included in this kit. 30kJ of energy is sufficient to charge 2 low feature phones or 1 smartphone to full (depending on type and energy capacity of the phone model).

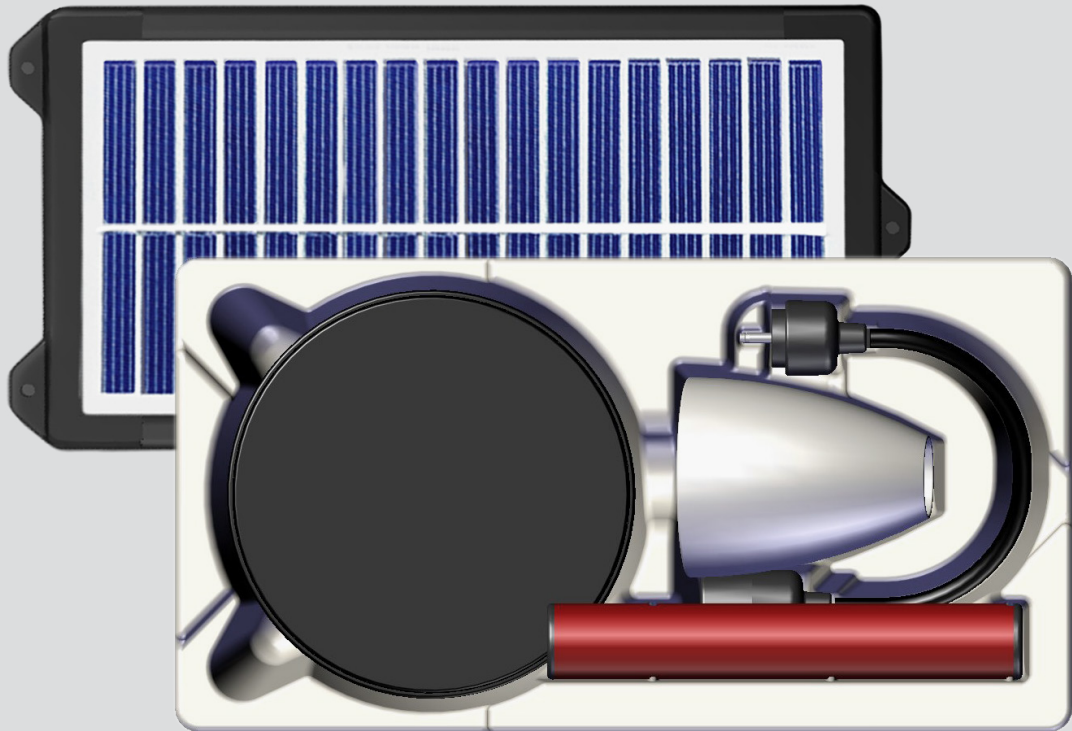

Besides charging a phone; the JouleStick can be turned into a 150 Lumen TorchLight by adding the JS Lite150 Attachment; and it can be turned into a Table Lamp by inserting the JouleStick into the Hub2TableBase and adding the GooseNeck and JS Lite150

The Hub2TableBase has 2 ports; one for the LEC30 energy input and the other for future expansion to other Sundaya Lightkits and accessories.
